

CNC Technician CNC Machinist CNC Operator

KP Components A/S, Denmark

KP Components is looking for qualified CNC technicians - or employees with many years of experience in operating CNC machines - for its headquarters in Spjald, Denmark. Our production is highly developed and automated, and we offer you interesting and challenging activities as well as a variety of tasks.

The main tasks include the operation of larger production cells, which typically consist of milling machines and robots.

We offer jobs in the day, evening and night shifts as well as on weekends. At *KP Components* there are many development opportunities and perspectives.

Your tasks:

- Programming and setup of modern CNC-cells and CNC-machines
- Operation and loading of CNC-machining centers
- Quality control and recording of quality data
- Measurement of workpieces in ongoing production

Your qualifications:

- You are professionally skilled or have a longer experience with CNC-production – preferably with knowledge on MAZAK CNC-machines.
- You can work independently and are quality-conscious
- You should enjoy working in Denmark

At *KP Components* you can expect an attractive salary with bonus, an excellent insurance / pension package and good labour conditions.

We will also support you actively in the relocation process to Denmark.

We are an international company and employ many nationalities and thus have a great experience in uniting different cultures.

Are you interested?

Please send your application to the HR-Manager, Annette Mosegaard jobbank@kp-components.com

We look forward to welcoming you!
